ABOUT THE Environmental Fair

If you're looking for ways to become more environmentally responsible, visit with community members at the Fair sharing their knowledge about community gardens, home energy efficiency, pollinator gardens, greening sacred spaces, solar energy, green roofs, and more. Several demonstration electric vehicles will be on hand - get your questions answered.

WHY COME?

We've all become familiar with the effects of climate change such as hotter summer days, floods and extreme weather to name a few. By helping to green Ottawa today, our families and neighbours will benefit tomorrow.
